-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Election/Restrictions***

Applicants' election without traverse of claims 14-21 in the reply filed on June 14, 2007 is acknowledged. Claims 1-13 and 22-31 have been cancelled. New claims 32-47 have been added. Claims 14-21 and 32-47 are pending and will be considered for examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-18, 21, 32-36, 39-44, and 47 rejected under 35 U.S.C. 102(b) as being anticipated by Showghi et al. (US 6,473,739 B1)(“Showghi”).

Showghi teaches a method, program, and device comprising: outputting a first page for display on an electronic device, the first page including a first field for receiving a first customer request (Figure 4, “34” and “36”); receiving the first customer request in a selected input modality chosen from among a plurality of input modalities available for data entry into the first field (Figure 4, “selection”; col. 4, lines 59-68; col. 5, lines 40-57; col. 7, lines 9-15); determining sales information responsive to the customer request; associating the sales information with each of the plurality of input modalities; outputting

Art Unit: 3625

a second page for display on the electronic device, the second page displaying the sales information and including a second field for receiving a second customer request in any one of the plurality of input modalities (Figure 4, "40", "42", "44").

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19, 20, 37, 38, 45, and 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Showghi et al. (US 6,473,739 B1) (Showghi") in view of Official Notice.

Showghi teaches all the limitations as noted above. Showghi does not teach VXML or HTML. However, Official Notice is taken that it is old and well known in the art to use HTML or VXML for data entry. Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to incorporate these features into Showghi. One of ordinary skill in the art would have been motivated to do so in order to provide a user with a user-friendly way of entering data.
